## Report –

As part of the curriculum, our M.Sc Analytical chemistry students are required to do extension activity to get marks and credits. In this regard every year our department is organising an extension activity programme in which our I year students and staff members were actively involved.

The objective of this programme is to create awareness among the women community about self-employment and entrepreneurship. In this programme, our students were demonstrating the preparation of household cleaning materials by using the required raw materials in correct proportions. Through this programme they motivated the women to earn more profit from less investment.

This year on 20.02.2022, our department has organised an extension activity programme at Kumbhar Galli, Titave. 30 students and 3 Staff members were actively participated in that Programme. At that activity, we planned to prepare Detergent powder and detergent liquid.

Then our students explained the ingredients used for the preparation of Detergent powder and detergent liquid and their proportions. They also demonstrated the preparation of the products in a well manner by adding the ingredients one by one.
