Detail Report:

Need of Fire Safety Training

The hazards from fire can pose a significant threat to your business or Institute. Every year many people are injured by fires that occur in the workplace -and the financial costs of a fire can be equally devastating. Annually, the cost to business through fire runs to many millions of pounds, and companies are all too often unable to recover from its catastrophic effects.

Jersey Fire and Rescue provides quality fire safety training which is specifically designed to help you and your employees meet your obligations within current legislation, such as Health and Safety at Work (Jersey) Law 1989 and the Fire Precautions (Jersey) Law 1977.

Introduction

The Campus Fire Safety Right-to-Know Act is an amendment to the Higher Education Opportunity Act. This amendment serves to increase campus fire safety awareness across the nation, providing students and their families with the fire safety records of colleges and universities. SVL College arranged Fire Safety Training on 19 August 2020 for student safety

All staff members as well as students will receive adequate fire safety training and all fire safety training sessions will be delivered by a competent person.

Fire Safety Education and Training

In the event of a fire or fire alarm, all staff and students are instructed to promptly evacuate in accordance with the plans for the building in which the fire occurs and to follow the instructions of the designated building safety contact, staff, and police and fire department, as applicable.

Emergency Action List

In the event that a fire alarm sounds in your building, please don't panic. Calmly do the following:

- Exit your room, closing and locking your room door behind you.
- Leave the building immediately. Use the stairs if you are on the upper floor.
- If there is smoke in the air, keep low. Smoke heat and toxic gases normally rise to the ceiling.
- Once outside, assemble a safe distance from the building (at least 150 feet).
- Make certain that emergency response personnel and equipment have access to enter the building.
- Try to account for students and staff known to have been in the building.
- Provide fire and rescue personnel information and location of the fire.
- Do not re-enter the building until the fire department has declared the building safe
