## Detail Report

Department Of Science organized HB and Blood Checking Camp at Bhairavanth Mandir of Palkarwadi on 29 September 2022, keeping in view the growing imbalance of man-women's ratio and various health issues of Human. Human health refers to the health of man and women, which differs from that of men in many unique ways. Women's health is an example of population health, where health is defined by the World Health Organization as "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity". Often treated as simply women's reproductive health, many groups argue for a broader definition pertaining to the overall health of women, better expressed as "The health of human".

These differences are further exacerbated in developing countries where women, whose health includes both their risks and experiences, are further disadvantaged.

The purpose of HB and Blood Group Checking Camp is – To raise awareness about the status and ratio of HB percentage in that area as well as which type of blood group is present in high amount so including that purpose we arranged the health camp at Bhairavanth Temple.

In this camp our students of Science checked the blood groups, HB of men's and women's without any cost. For this Social Activity responsible persons, Miss Pooja chiturkar mam.

We conducted camp in Bhairavnath Mandir Palkarwadi. For these camp All members of Bhairavanth temple were present. Almost many participated in camp. Especially girls were interested to check and count blood group and HB respectively.

Out of these many more than 40% had B + ve group. Most important thing is no one found having O – ve group, which is termed as universal blood donor group and also we found that A – ve blood group students were less than 1 %.

HB count is most critical in rural areas. We took HB count which has 10 to 11 in range, which should be in range of 13.5 to 17.5 gm. /dl for men and 12.0 to 15.5 gm/dl for women. But we found that women's HB count is 10 or less than 10. Now it's necessary to educate or aware all the students especially Girls what is the importance of Haemoglobin in humans body. Committee of temple genially supported us.
