Report

Department Of Science organized Blood group and Hemoglobin Checking Camp at Doodhsakhar Vidhyaniketan & Junior College, Bidri on 13 January 2022, keeping in view the growing imbalance of man-womens ratio and various health issues of Human. Human health refers to the health of man and women, which differs from that of men in many unique ways. Women's health is an example of population health, where health is defined by the World Health Organization as "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity". Often treated as simply women's reproductive health, many groups argue for a broader definition pertaining to the overall health of women, better expressed as "The health of human".

These differences are further exacerbated in developing countries where women, whose health includes both their risks and experiences, are further disadvantaged.

The purpose of HB and Hemoglobin Checking Camp is – To raise awareness about the status and ratio of HB percentage in that area as well as which type of blood group is present in high amount so including that purpose we arranged the health camp in village Bidri.

In this camp our students of Science checked the blood groups, HB of college staff and students. Without any cost. For this Social Activity responsible persons Mr. S.M.Powar, Miss Pooja Chiturkar & Miss. Kajal Balugade.

We conducted camp at Doodhsakhar Vidhyaniketan & Junior College in Bidri. For these camp All teachers staff were present. Almost 50 students participated in camp. Especially girls were interested to check and count blood group and HB respectively.

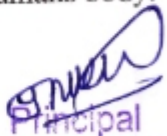

Out of these 50 students more than 40% had B + ve group. Most important thing is no one found having O – ve group, which is termed as universal blood donar group and also we found that A +ve blood group students were less than 5 %.

HB count is most critical in rural areas. We took HB count which has 10 to 11 in range, which should be in range of 13.5 to 17.5 gm/dl for men and 12.0 to 15.5 gm/dl for women. But we found that womens HB count is 10 or less than 10. Now it's necessary to educate or aware all the peoples especially womens what is the importance of Hemoglobin in humans body. Doodhsakhar Vidhyaniketan & Junior College genilly supported us.

To,
Principal,
Shahid Virpatni laxmi Mahavidyalaya,
Titave.

Respected Sir,

We sincerely thank you enough for the special, excellent care you have conducting hemoglobin and blood checkup camp in Doodhsakhar vidhyaniketan and jr. college, Bidri . Also promote preventive healthcare and reduce the incidence of diseases. Wishing you a good luck for more social work like this.

Yours faithfully,

मुख्याध्यापक
