Report-

As part of the curriculum, our M.Sc, Analytical Chemistry students are required to do extension activity to get marks and credits. In this regard every year our department was organising an extension activity programme in which our 1st year students and staff members were actively involved.

This year all the students and staff members of our department of chemistry actively participated in the dengue awareness programme which was jointly organised by the Analytical Chemistry department and our College on

16.10.2023. The objective of that programme was to create awareness among the people about the causes, consequences and the preventive measures of Dengue fever.

Students visited the houses one by one in Patil Galli, Mhakave and searched the causes for the growth of dengue mosquito in each house. Then they gave tips to the housemates that how to avoid the growth of dengue mosquitos, to prevent the spread of dengue fever and also how to protect them from dengue fever and also they gave Dengue Mosquito killing liquid which was given by our college to the people in that area.

That awareness programme was very useful for our students to get knowledge about causes, consequences and the preventive measures of Dengue fever and also for the people to get awareness about the Dengue fever through our students.
