Covid 19 Vaccination Camp

A coronavirus is a kind of common virus that causes an infection in your nose, sinuses, or upper throat. Most coronaviruses aren't dangerous. In early 2020, after a December 2019 outbreak in China, the World Health Organization identified SARS-CoV-2 as a new type of coronavirus. The outbreak quickly spread around the world.

COVID-19 is a disease caused by SARS-CoV-2 that can trigger what doctors call a respiratory tract infection. It can affect your upper respiratory tract (sinuses, nose, and throat) or lower respiratory tract (windpipe and lungs). It spreads the same way other coronaviruses do, mainly through person-to-person contact. Infections range from mild to deadly.

The world is in the midst of a COVID-19 pandemic. As WHO and partners work together on the response -- tracking the pandemic, advising on critical interventions, distributing vital medical supplies to those in need they are racing to develop and deploy safe and effective vaccines.

Vaccines save millions of lives each year. Vaccines work by training and preparing the body's natural defences – the immune system – to recognize and fight off the viruses and bacteria they target. After vaccination, if the body is later exposed to those disease-causing germs, the body is immediately ready to destroy them, preventing illness.

Wearing masks and staying 6 feet apart from others help reduce your chance of being exposed to the virus or spreading it to others, but these measures are not enough. Vaccines will work with your immune system so it will be ready to fight the virus if you are exposed.

Over 100 staff members including senior teachers were vaccinated at the day-long- anti-Covid-19 Vaccination Camp, organized at Vidyaniketan School, Titave Campus here. The camp was organized by the Shahid Virpatni Laxmi Mahavidyalay in collaboration with the Department of BCA and NSS Unit.

Special arrangements were made for the special camp under the supervision of _____ and _____, Medical Officer. _____ thanked the team of for safeguarding the lives of the people, Honorary Secretary, Khalsa College Governing Council has already issued orders for Corona Vaccination for staff in view of the safety of the staff of all the Shahid Virpatni Laxmi Mahavidyalay.

_____ has encouraging the staff members and villager as it was imperative to follow the guidelines issued for the prevention of this disease, all should take advantage of the facilities being provided by the government for vaccination. Principal said that with such initiatives, the vaccine would be able to reach the masses more quickly and the College would continue to avail this facility of the government in collaboration with the department as and when required.

during in this special vaccination camp, _____ received the full support from the college administrators and the entire staff.

Response of villagers were also very good during this camp.
