**Detail Report –**

Shahid Virpatni Laxmi Mahavidyalaya Titave, Faculty of Sciences organizes tree plantation at Pal in presence of Chief mentor Dr. Jagannath Patil sir , Principal Mr. Prashant Palkar sir, Science faculty head Mr.Rahul Kamble sir, B.Sc.IT faculty head Mr. Santosh Chougale sir,. B.CA.faculty head Mrs. Ahilya Patil madam, BAMB faculty head Mr. Digvijay Kumbhar sir, teaching and non teaching staff and students from all departments of college.

The main reason for the plantation was to spread awareness and importance about tree plantation within all. And save environment as we can. Trees have so many good qualities in them which makes them nature's most useful gift but their best quality is their ability to provide oxygen that is very essential for human survival. Some of the advantages of planting trees are that they provide food, protection, and homes for many birds and mammals. People must understand the importance of planting trees and how it helps our environment in so many ways. Trees are often associated with feeling pleasant, calm, and relaxed. Planting trees can also help people become better versions of themselves as it would not only make them feel accomplished but also would be helping to protect our environment.

Trees play a major role in developing one's childhood and record the history of the family as they grow and develop beside you and your family. People emotionally connect with the trees that they plant and instantly create a bond with them. We get personally attached to the trees that we like and see every day. Because of these strong bonds that we have with trees, there are multiple groups and organizations across the world that solely deal with protecting and saving large and historic trees from the risks of our modern developments. About 900 plant planted at that time successfully.
