**Caption:** Arjunwada Village Students and Women's HB and Blood group checked by our DMLT and B.Sc. Students. (9-03-2022)

## Detail Report

On the occasion of International women's day faculty of science organized 'Health camp' keeping in view the growing imbalance of man-womens ratio and various health issues of womens . **Women's health** refers to the health of women, which differs from that of men in many unique ways. Women's health is an example of population health, where health is defined by the World Health Organization as "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity". Often treated as simply women's reproductive health, many groups argue for a broader definition pertaining to the overall health of women, better expressed as "The health of women".

These differences are further exacerbated in developing countries where women, whose health includes both their risks and experiences, are further disadvantaged.

The purpose of celebrating Womens Day is – To raise awareness about the status and dignity of women among the students.so including that purpose we arranged the health camp at village Arjunwada.

In this camp our students of B.Sc. and DMLT checked the blood groups, HB and blood pressure of native womens and school , highschool girls without any cost. For this Social Activity Where Sarapanch of Arjunwada and all members of Grampanchyat Committee.
